Auto Code Co.,Ltd.

Ful Injector Tester & Cleaner

[Call for Pricing](#)

New Function

- Procedure setting and memory:the working parameter(such as injection pulse width,injection time and rotation speed,oil pressure) could be set according to your requirement and stored in and recalled from the device memory

- Contamination test:a set of attachment for test the injector containmination

Features

• Test range : MPI, CIS,MONO,TBI injector (top feed and side feed)

• 6 Cylinders injectors Tester and Cleaner

• Injector fuel distribution and delivery checking; leakage hunting;injector cleaning; engine carbon deposit cleaning.

• Automatic operation: Engine idle, Middle speed; High speed working condition simulation.

• Drain the test liquid from the tube automatically.

• Separated ultrasonic bath /With movable dolly.

• Test liquid pressure tracking and stablization automatically/overheat and combustibile gas alarm system.

• Adjust oil pressure electronically/multiple oil rail.

• Program store and recall/contamination test/test liquid pumping back to tank automatically after testing.

•

•

Specification

•

- Numbr of testing injectors : 6

- Oil pressure : 0-686 kpa (7 kg)

- Rotation Speed : 0~9950 r/min step 50 r/min

- Pluse Duration : 1~20 ms step 0.1 ms/ Injection Number of Time/ Injection time : 0~10000 step 50/0~600sec step 1 sec
